Bathroom Obsessed

Over many years, we've obsessed over bathroom design, focusing on products that deliver the perfect blend of form and function to make everyday routines a more experiential ritual.

Our eight high-quality design-led furniture collections cater to all the essentials of bathroom storage in creative and clever ways, whatever your design style.

Matched with a comprehensive selection of stylish basin units, mirrors, cabinets, premium towel warmers, performance sanitary ware and luxury finishing touches, you have all the inspiration to create your perfect bathroom experience.

Why Choose Crosswater?

A Perfect Blend Of Form & Function

Over time as bathrooms have evolved into more experiential spaces for relaxation & revitalisation, Crosswater has curated a comprehensive collection of high-quality solutions covering each essential element.

Furniture

Basins & Toilets

Mirrors & Towel Warmers

Often the centrepiece of any bathroom, Crosswater furniture and ceramics are the perfect blend of form and function. Matched with mirrors, cabinets, towel warmers and all the finishing touches, you can truly realise your dream bathroom space.

All Crosswater products are supported by a network of over 1000 approved retailers who can be found at www.crosswater.co.uk

Reassuring Performance, Always

Crosswater's reputation as a leading supplier of high-quality design-led furniture for bathrooms, basins, toilets, mirrors and towel warmers has been built over many years.

We employ a combination of advanced manufacturing techniques, high-quality materials, and finishes to bring you products of the highest possible calibre.

All of the products in this brochure are manufactured to meet and exceed all relevant British and European standards.

Complete Peace Of Mind

We're so sure of the quality of our products that we offer reassuring guarantees on all products in this brochure*

Additionally, a dedicated team of bathroom experts whose knowledge and experience are on hand and ready to help before, during and after your products are installed.

Full warranty terms and conditions are available at www.crosswater.co.uk

*Subject to online registration and exceptions

Choosing Your Furniture

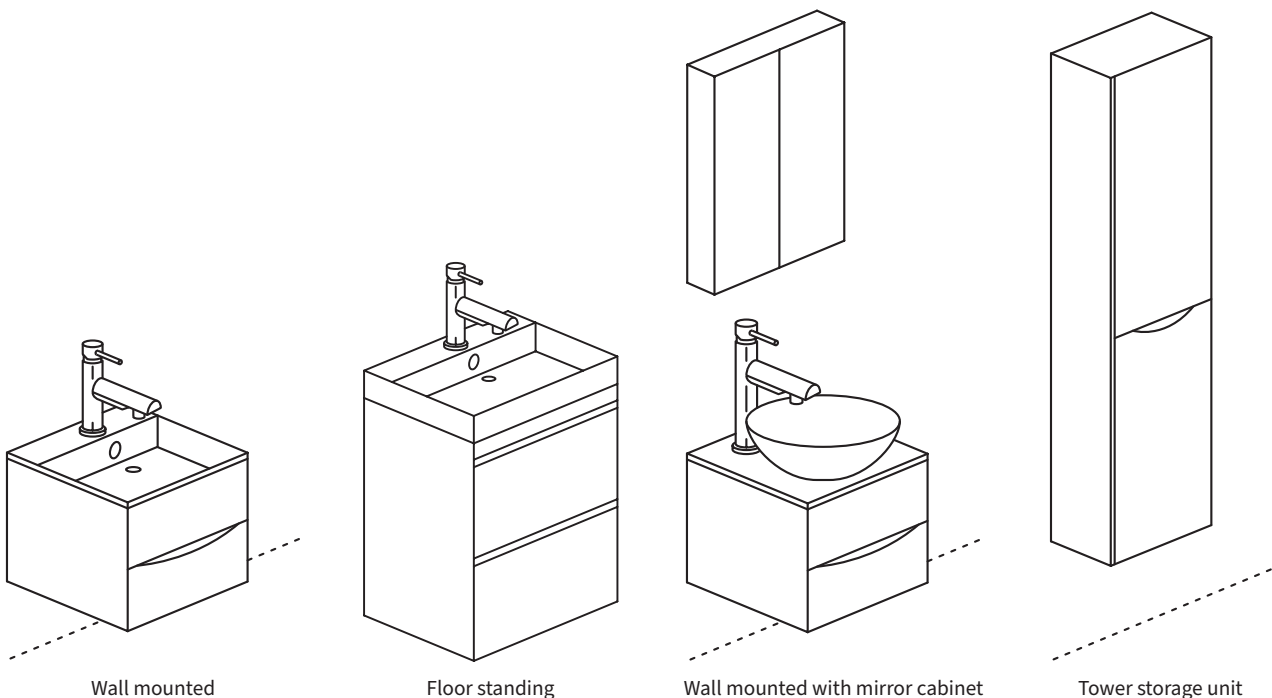

Before looking for furniture, think about what you will need to put away in the bathroom itself. Furniture for bathrooms should be stylish whilst comprising great construction and performance qualities, and above all, have the ability to provide storage space for the entire family. Try to think about the future, as the family grows will you need more space? If so, choose the largest storage furniture to fit your bathroom, then you don't have to try to squeeze extra furniture in later. All Crosswater furniture is recyclable and made from 85% recyclable sources.

1. Choose your size and type

The best furniture includes storage space below whilst the basin sits above. Wall hung furniture means the furniture is off the floor, giving the impression of extra space and a sleeker more stylish bathroom which is easy to clean and ideal for a busy family bathroom. All Crosswater wall mounted furniture is fully load bearing to a minimum 90kg.

Floor standing bathroom furniture can come with cupboard doors or drawers. These units maximise storage by going right down to the floor and can also have the benefit of hiding any unsightly pipe work. All Crosswater floor standing furniture units are supplied pre-assembled and constructed from extremely strong 18mm board.

Additionally, mirrored cabinets are available and combine two must-haves in one, plentiful space for regularly used toiletries or other smaller items that might get lost in larger cupboards and an over basin mirror ideal for helping with make up and shaving. If it's just a simple mirror you require, Crosswater has a wide selection of standard and illuminated versions.

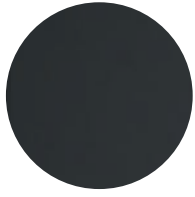

2. Choose your finish

Crosswater offers many styles to match either a modern or traditional bathroom design perfectly. Contemporary bathroom furniture is often white, which will reflect light to make a small bathroom feel bigger. Striving for something different? Look at our Matt Black or Greys, which offer a striking contrast to the basin and toilet. Alternatively, consider adding a more natural feel to your furniture with a choice of wood-look laminate finishes or real wood veneer options.

Real Wood Veneers

All Crosswater real wood veneer furniture finishes are produced from sustainable sources with a specially formulated anti-UV varnish to prevent the wood from fading.

The unique nature of real wood veneers means there will always be variance in tone, grain and colour appearance.

This is just part of the enduring beauty of real wood veneer furniture but does mean that when ordering you should consider ordering all components at the same time to get the best chance of sourcing products from a similar batch.

PU

Crosswater veneer, laminate and wood effect finishes feature higher moisture-resistant qualities than ordinary furniture using polyurethane adhesives on the edge finishes. These adhesives also deliver a virtually invisible 'zero bond line' and outstanding thermal stability maximising the lifetime of the product.

ACTIVE

Some finishes feature as standard a ground-breaking non-toxic and permanent antibacterial treatment called ACTIVE guarantees unlimited protection as the treatment is permanent and under tests reduces the proliferation of common bacteria by more than 99%.

Sustainability

All timber products used in our furniture are sourced responsibly and conform to Forest Stewardship Council® Chain of Custody Certification (FSC®). Crosswater timber products are produced from controlled material sources, which are harvested and replaced or allowed to regenerate naturally.

ARTIST®

The stunning Artist collection is a perfect blend of form and function which makes high-end furniture for bathrooms more accessible.

Featuring a signature solid oak worktop Artist is truly differentiated. Its fusion of softer, more human styling, textures, colours and natural materials cross typical boundaries.

Depending on brassware selection, it can easily be the centrepiece of a modern, contemporary or classic bathroom space.

10 Year Guarantee*

- 1 x 1000 drawer unit
- 1 x link unit (left or right)
- 1 x 1200mm worktop

1400 Layout

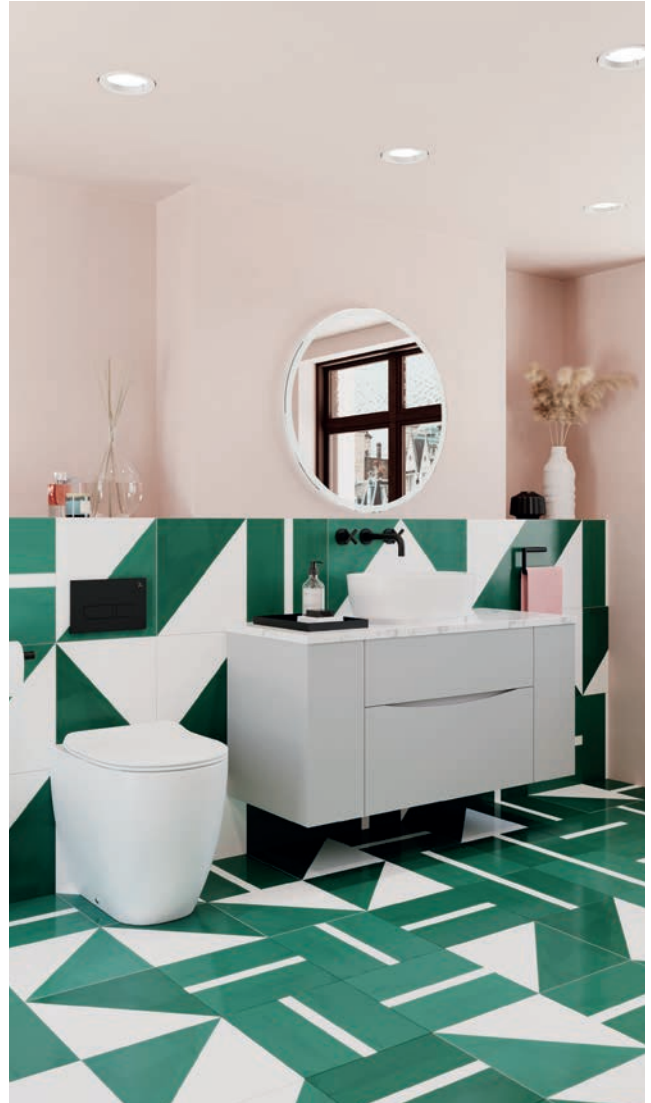

- 1 x 1000 drawer unit
- 2 x link units (left, right or one each side)
- 1 x 1400mm worktop

Modular storage to suit your needs

Glide II drawer units can be used alone or with our optional link units to create your personalised storage solution; with the wide choice of layout options it the perfect choice for any bathroom.

Glide II Carrara Marble Effect solid surface worktops are highly heat resistant, impenetrable to dust, dirt and bacteria and easy to clean. Simply drill on site for basin waste and tap fittings.

We have a wide choice of compatible basins to complete your bathroom, see page 92. Please note the basin must be positioned in the centre of the drawer unit.

Effect

Worktops

All worktops are produced from 18mm thick, high density core board. The surfaces are resistant to day to day wear and tear, impact, scratching and normal household cleaning agents. White and grey worktops are slightly matt with a subtle texture. The Pure white Gloss edging matches the furniture carcass. All worktop tops have a factory fitted aluminium reinforcing bar on the underside.

Real wood veneer

All our real wood veneer finishes are book matched and produced from sustainable sources. The characteristic nature of natural veneers means there will be variance in tone, grain and colour, this is just part of the enduring beauty of wood veneer furniture.

When ordering more than one unit we recommend taking delivery of products at the same time.

INFINITY Made Easy

Infinity modular units can be used to design your personalised storage solution; with our drawer units, shelving units and worktops the layout options are almost infinite.

Choose your layout

Infinity drawer and shelving units can be used in combination to create layouts from 500mm to 1400mm wide. Please use the below to select your ideal layout:

500 Layout

- 1 x drawer unit
- 1 x 510mm worktop
- 1 x handle

Choosing your Basin

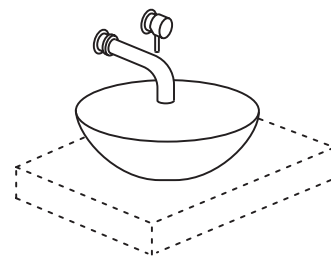

Crosswater basins are available in wide range of styles, installation types, materials and finishes. Allowing you to choose your perfect basin no matter your space, furniture unit or style. Crosswater basins use materials such as fine fire clay allowing for more complex designs and super-slim edge profiles, cast marble which offers a wide range of colour finishes and strong scratch proof PLUS+TON®.

Countertop

Countertops basins are the ideal choice if you want to create a luxury style. Available in a range of shapes, this type of basin has been designed to be fitted on top of a worktop or solid surface, Crosswater's offer includes ranges with a tap hole and some without. No tap hole variants are usually teamed with a tall monobloc or wall mounted mixer tap.

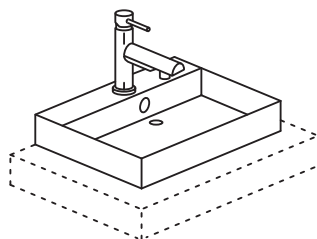

Tall Monobloc Tap

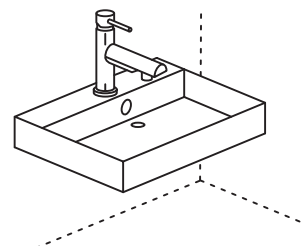

Wall Mounted Tap

Back to Wall Countertop & Wall Mounted

Many of our wall hung basins are perfect for use as a countertop basin on furniture when fitted directly against a wall in addition to being used as a normal wall hung basin. These basins have the flexibility of having a tap hole to match up with a standard monobloc mixer tap. A wide ranging selection of sizes, styles, and bowl depths to choose from whatever your bathroom requirement.

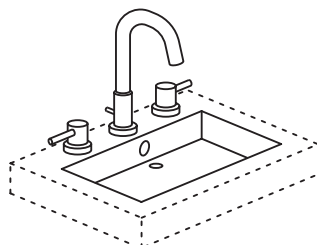

Countertop

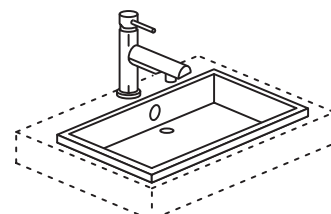

Wall Hung

Undermount & Inset

Undermount and inset basins are a favourite in many high end hotels, offering a simple yet stylish appearance with plenty of worktop space for taps, toiletries and soaps. Worktops need to be pre-cut to accept the basins and are secured to the underside of the worktop using metal brackets and silicone.

Deck Mounted 3 Tap Hole with Undermount Basin

Monobloc Mixer with Inset Basin

Basin Waste Options

Depending on your design preference your basin may have an in built water overflow or not. It's important to choose the right waste to suit your basin.

If your basin has an overflow, it will require a slotted basin waste to allow the water to flow into the waste. If you have no overflow on your basin, you need an unslotted waste. Crosswater also offer a universal waste which is compatible with most slotted and unslotted basins.

Please use the matrix on the opposite page to ensure you select the correct waste.

Slotted

Unslotted

Universal

Complementary Brassware

Selecting the right tap for your basin is essential to achieve your desired look and performance. Always select the basin before the mixer fittings and ensure you choose a washbasin that can accommodate the style and size of your choice of mixer. When choosing a basin and mixer, consider your water pressure. Higher water pressures or pumped water supply systems will influence the suitability of your chosen tap and basin, so take note of your water pressure. A high pressure reducing valve or flow restrictor will give you added flexibility.

Choosing your Toilet

Crosswater toilets are available in many design styles so you can easily create a look that's perfect for your bathroom. Each toilet is made from 100% non-porous vitreous china and is designed to conceal all pipe work for a clean and simple design. Crosswater toilets meet all required performance and quality standards. All Crosswater toilets have matching soft close seats and covers which are sold separately.

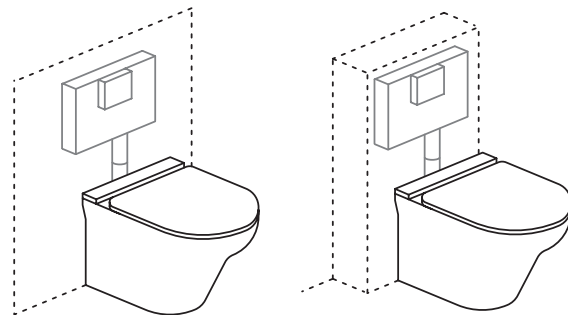

Compact Close Coupled

Close coupled toilets, once the most common due to ease of installation consist of 2 parts, where the cistern including flushing mechanism is fitted directly on top of the toilet pan. Choose from closed back to wall design to conceal pipe work from view, ensuring a neater finish and easier cleaning or open back for easier installation. All feature efficient dual flush mechanism.

Back to Wall

Floor standing back to wall toilets do not need any type of support frame as they are fitted to the floor and allow the toilet to have a smaller footprint in order to maximise room space. They do require the a cistern to be built into the wall or installed inside toilet furniture. Back to Wall toilets offer the best solution for a straight replacement of a close coupled toilet.

Concealed Cistern
(In Wall)

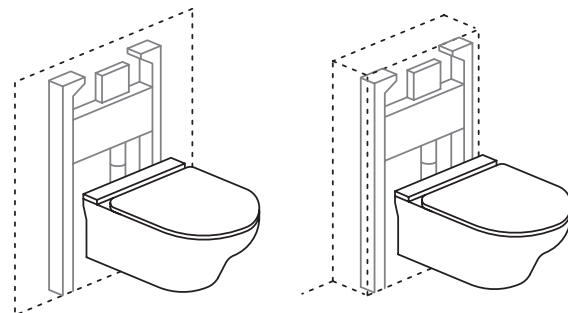

Concealed Cistern
(Toilet Furniture)

Wall Hung

Wall hung toilets feature all the space-saving benefits of a back to wall toilet and are designed to be fitted with a supporting installation frame which contains an in-built cistern. These frames can support a weight of up to 400kg for complete peace of mind and allow the user to adjust the height of the toilet to suit all the family.

Raising the toilet off the floor creates the illusion of even more space and promotes better hygiene by making cleaning the bathroom easier.

The in-wall frame can be installed in a wall cavity, or on selected models using one of our toilet furniture units on the wall removing the need for costly installation.

Support Frame
(In Wall)

Support Frame
(Toilet Furniture)

Rimless Design

The Crosswater toilet range presents many different and often unique styles. Some feature a tried and tested closed/box rim providing great bowl flushing.

The latest ranges are offered with a smart 'rimless' bowl format. Rimless design means 100% of the flush water is used to clean the bowl also creating not only a better looking toilet but more importantly, one which is easier to clean, resulting in much better hygiene as there is nowhere for bacteria or lime scale to accumulate.

Soft Close Seats

All Crosswater toilets feature ergonomically designed, stylish whisper-quiet soft close seats and covers, colour matched to the ceramic. Produced from high quality materials, Crosswater seats remain whiter for longer and are easy to clean.

Our Portfolio

GLIDE II

Glide II toilets are designed with quality, precision and refined proportions to create beautiful shapes. As well as our classic Gloss White, selected toilets are offered in a smooth and durable Matt White ceramic which provides a more luxurious and warmer feel.

The smart rimless design creates not only a better looking toilet but a cleaner and more hygienic toilet as there is nowhere for bacteria, limescale or grime to accumulate. Additionally, the fully glazed internal waterways feature means Glide II toilets deliver complete cleanliness.

Space Saving

Glide II wall hung toilets are available in a 'mini' variant which is a little wider but has 2" shorter projection for rooms where optimising space is critical.

Rimless Design

Glide II rimless toilets completely revolutionises the concept of toilet flushing systems to guarantee maximum hygiene and cleanliness with powerful near silent flushing.

KAI X

A combination of aesthetics and function, our Kai X toilets are both simple and versatile in style, offering a level of design and comfort that combines effortlessly with every bathroom style.

Our Kai X range has space-saving solutions to help you make the best of your bathroom with great “compact” close coupled toilets, full back to wall or easy to install open backed - all including the very best hygienic glaze throughout.

SUPPORT FRAMES & CISTERNS

2 Year Guarantee*
Peace of mind

Support Frames & Cisterns

Our support frame and cistern range is designed specifically for UK homes, featuring an array of innovative designs and installation features, which is why our products are renowned for excellence in design and quality.

Layout Versatility

Whatever the size or shape of your bathroom, Crosswater fitting systems can be utilised in any bathroom to safely install a toilet that suits your lifestyle. The smart and versatile systems mean that you can take your design aspirations and make them a reality. Easily install a toilet right next door to a shower by having the cistern concealed in a wall. The back-to-wall toilet is perfect for complementing the toilet cisterns when concealed within furniture or a cavity.

Simple Installation

From large new build family bathrooms to modernising a bijou en suite, the ease of installing Crosswater flushing systems ensures that your project runs smoothly. Time and cost effective, frames can be built into a wall cavity or placed in front of a wall using a clever cistern surround. If you want to tile a wall, select a waterproof frame surrounds that can also be tiled. Alternatively, for a completely harmonised bathroom scheme, simply choose a surround to match your Crosswater furniture.

Wall Hung Support Frames

Wall mounted furniture cleverly makes a compact bathroom appear less cluttered and more spacious. Open up the smallest of spaces or enhance larger bathrooms by creating more floor space, which instantly creates the illusion of space. For busy family bathrooms, it is also quicker and easier to clean.

See page 130 for Wall Hung Toilet Support Frames.

Concealed Toilet Cisterns

Create a sense of space and understated hotel style with a concealed cistern, or combine with our toilet furniture units - a modern solution for a clutter-free, designer bathroom. There is a choice of heights to suit where the flush panel is situated, accommodating any constraints of the room.

See page 132 for Concealed Toilet Cisterns

Cleverly designed for your bathroom

Crosswater flush plates complement any bathroom design. We offer a wide range of finishes to beautifully match your brassware, toilet and furniture.

Our flush plates are:

- Easy to fit
- Dual flush - including eco flush
- Smooth yet positive operation
- Manufactured from high impact, tough ABS or thermal tempered glass
- Actuation force 20NM
- Compatible with our toilet frames and concealed cisterns

There is no need to worry about maintenance as all cistern parts can be accessed by simply removing the flush plate.

The dual flush technology allows you to reduce your water usage by up to 40%. Press the large button to flush with the entire water volume, or the smaller button for an Eco flush (reduced 3 litre volume).

MIRRORS & CABINETS

5 Year Guarantee*
Peace of mind

Illuminated Mirrors

The ultimate bathroom essential to assist with daily routines, our range of mirrors give you plenty of extra features.

5mm mirror glass

PVC film backing safety glass complying to BS EN 6206 1981 that avoids dangerous shards being created in case of an accident. A special treatment is also applied to the mirror edge that prevents the mirror edges becoming discoloured.

IP44 Class 1 rated

All our mirrors are IP44, Class 1 rated and suitable for installation in Zones 2 and 3 of a bath or shower room. Mirrors conform to BS EN 60598-2-1. See page 175 for more information on electrical safety and installation.

LED lighting

Providing superb function with fabulous decorative style, all mirrors feature high luminosity, low energy consuming LED lighting. See product details for light temperature.

Charging socket

Selected models come with a charging socket for easy and safe recharging of shavers or toothbrushes.

Heated demister pad

Most of our mirrors are equipped with demisting pads that heat the mirror to a few degrees above room temperature within 2-3 minutes, preventing the mirror from misting. The demisting will spread approx. 10-20% further than the pad.

Touch controls

Selected Crosswater mirrors are equipped with a one touch control for easy on/off, light temperature change and dimming.

No touch infrared on/off switch

Selected Crosswater mirrors are equipped with a no touch infrared on/off sensor situated on the side of the mirror.

Mirrored Cabinets

Store away those everyday bathroom essentials discreetly and safely with our range of stylish mirrored cabinets.

Double sided mirrored doors

Head and shoulders height viewing, enabling you to use the mirror even when the door is open. The mirror's edges are sealed to minimise the possibility of moisture damage.

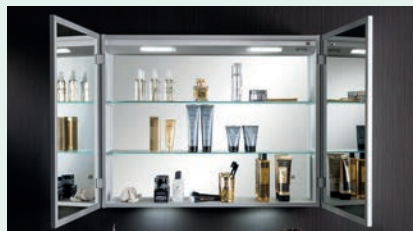

IP44 Class 1 rated & CE approved

All our mirrored cabinets are IP44, Class 1 rated and CE approved. See page 175 for more information on electrical safety and installation.

Charging socket

Our cabinets come with an internal charging socket for easy and safe recharging of shavers or toothbrushes.

Continuous shelf height adjustment

Intelligent shelf height adjustment allows shelves to be adjusted to any height, without unsightly drilled holes.

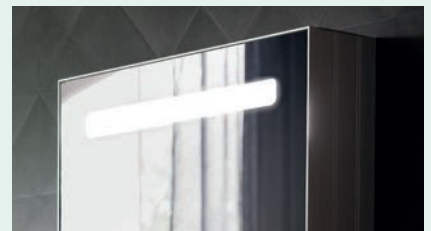

LED lighting

Near natural truly practical low energy light source. No-flicker instant on and off illumination. Low energy consuming LED lighting. See product details for light temperature.

No touch infrared on/off switch

High-tech sensor switch, so no unsightly pull cord, discreetly positioned underneath the cabinet for simple use.

Aluminium carcass

Fully rigid, strong, easy to maintain, anodised aluminium carcass, perfect for use in humid bathroom conditions.

Important information

Mirrors must be mounted so that the sensor switch is a minimum of 150mm from an adjacent wall or obstruction to ensure function of the sensor switch.

If a mirror is mounted portrait, the sensor is located on the bottom right hand edge of the mirror. If mounted landscape, the sensor switch is located on the bottom left hand corner.

All mirrors and cabinets are IP44, Class 1 rated and suitable for installation in Zones 2 and 3 of a bath or shower room, see page 175 for more information on electrical safety and installation.

Innovative Design For High Heat Output

Air rails feature innovative manufacturing technology that injects air at very high pressure into the cross rails, this expands the cross rails to allow more hot water to circulate to generate excellent heat output.

Heated Towels All Year Round

MPRO All electric towel warmers are ideal for bathroom projects where installation on the central heating system is not possible. Oil filled and 100% pressure, leak and function tested at our factory.

Oil filled means better and more even heat distribution throughout the entire rail, excellent heat retention so less energy is required to top up temperatures in your room. Once the timer period has ended these rails will continue to gently radiate heat and keep the room comfortable because the oil inside is designed to cool slowly.

Great for the summer time when the central heating is off but cosy warm towels required.

Why Choose Electric?

Our MPRO Electric towel warmers are supplied with a control dial, instead of a traditional valve, which includes innovative features:

- 5 temperature settings ranging from 30°C to 60°C.
- An electronic temperature sensor that guarantees precise temperature control
- Illuminated LED indicators display the set temperature level and the status of the heating
- Dryer/Boost on demand function allows the setting of a higher heating power for two hours, after which the element returns to the previous setting
- In the event of a power failure the element remembers the previous settings therefore making it suitable for connection to external timers

You can rely on the safety of our MPRO Electric towel warmers:

- The element is equipped with frost protection and double protection against overheating
- The display shows warning indicators in case of malfunction
- An active safety feature in case the rail runs dry
- Low power consumption in a standby mode

SUMMER HEATING ELEMENTS

Electric Element

Supplied with T Piece

IP54 rated

These elements can be used in an all electric installation, we do not offer this service.

300w	RADX350	£115
600w	RADX700	£130

Also known as dual fuel or dual energy. Connected to a central heating circuit and including an electrical element that allows operation in summer months when the central heating is not in use.

All Crosswater towel rails are suitable for use with a summer heating element, except MPRO Electric models. Refer to pages 170 for wattage required per model.

Important Note

Please refer to the bathroom zone diagram when using electrical components within the bathroom environment, see page 171. The summer element is equipped with a thermal fuse that will cut out at 65°C, with a total shut down safety setting at 78°C.

These elements are suitable for all Crosswater towel warmers, where an element can be fitted. Heating elements comply with BS EN60335-2-73:2003

Metallic Black Matt / Soft White Matt Finishes Oxsilan® providing up to 65% more protection than standard zinc coating. High quality double layer Electro-static powder coating application for 100% surface coverage, massively reducing wear and tear and greater product lifetime. The most efficient heat output up to 20% higher than chrome. Self coloured metal wall fixings.

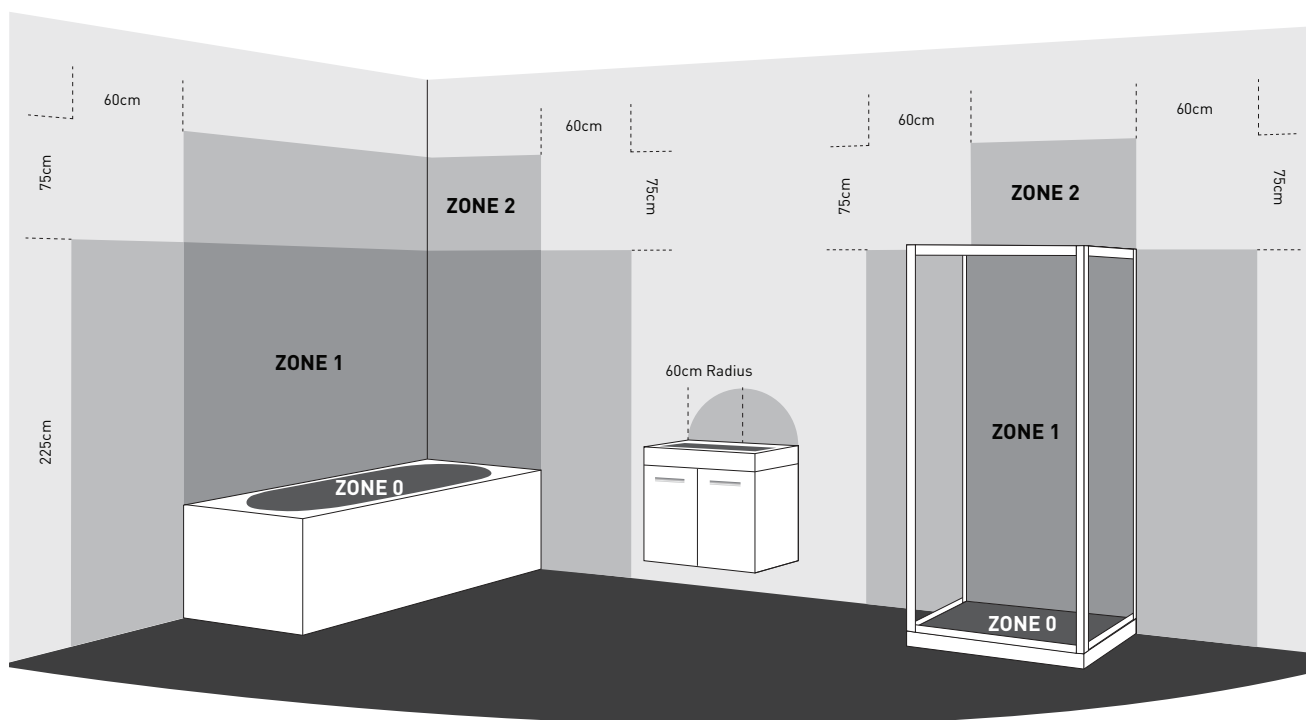

Chrome Finish Each rail is 100% wheel polished and sandblasted then electro chemically de-greased and bleached to prevent oxidising, ten: Nickel Primer 3micron / Copper coat 20-25 micron (for flatter surface and enhanced protection) / Nickel 20-25 micron / Chrome finish 0.5 micron - Result level 10 chrome plated finish.

Towel Warmer projection is between 75 - 100mm. Supplied with complete wall fixings and manual air vent. Manufactured from high grade mild steel conforming to EN 10305. Geometrical and surface finish - Round EN 10234 / EN ISO 4287, Flat Tube EN 10233 / EN ISO 4287, D Profile EN 10233 / EN ISO 4287. Fitted with 1/2" BSP connections. Tested to EN 442 ΔT = 50K All outputs certified to EN 442. To make an approximate conversion from T=50K to T=60K multiply outputs by 1.2.

**Summer Heating Elements are supplied with T Piece.

Electrical Information

The diagram below is supplied as a guide to Bathroom Zones as referred to in IP ratings of the over mirror lamps and electric heating elements. Please refer to the latest edition of BS 7671:2008(2011) to ensure conformity.

It is important to install light fittings and electric Towel Warmer elements in the correct bathroom zone i.e. the zone referred to in the IP rating of the element. This is not an installation guide and reference should be made to the latest edition of the IET Wiring Regulations or a qualified electrician member of NICEIC or IET.

Zone 0 is inside the bath or shower tray itself. Any appliance used in this zone must be rated at least IP67 which is total immersion proof.

Zone 1 is the area above the bath or shower tray to a height of 2.25m from the floor. In this zone a minimum rating of IP44 is required and elements must also be protected by a 30mA residual current device (RCD) to protect the circuit. The electrical connection to the power supply for these appliances must be in Zones 2/3 of the bathroom in compliance with BS 7671:2008(2011) - IEE Wiring Regulations.

Zone 2 is an area stretching 0.6m outside the perimeter of the bath and to a height of 2.25m from the floor. In this zone an IP rating of at least IP44 is required. In addition it is good practice to consider the area around a washbasin, within a 60cm radius of any tap to be considered as zone 2.

Crosswater IP44 lamps come without a pull switch, and are designed to operated via an existing and suitable room light switch.

Failure to have electrical products installed and certificated by a qualified electrical engineer will invalidate any product guarantee.

For full details reference should be made to the latest copy of the IEE wiring regulations and all applicable British Standard and European norm specifications.

Product Guidelines

Product Compatibility

While the majority of Crosswater products are compatible, care should be taken on product selection before ordering to avoid installation issues. The colours and finishes reproduced in this brochure are as accurate as the photography and printing process allows but may vary from the actual colours. Product sizes stated are nominal and should be checked against product. It is strongly advised that all bathrooms are well heated and ventilated.

Installation

All furniture ranges incorporate a factory fitted hanging system that allows safe and simple installation. Please ensure the correct wall fittings are used on solid or stud walls. Some furniture products are reversible for left or right hand door opening.

When installing a wall hung toilet or basin please ensure that appropriate fixings or suitable framework are used. When purchasing a wall hung toilet or basin on its own Crosswater does not supply fixings.

We strongly recommend all furniture and ceramics are fitted to a tiled surface, not tiled up to, this will assist any future maintenance. Due to the weight of some products you must ensure that the walls you are fixing to are of a suitable construction to support the product.

Vitreous China must not be put under stress during installation, if fittings are over tightened it creates stress within the ceramic material which may in time cause the failure of the product. Waste fittings should be carefully sealed in silicone and the back nut hand tightened, one additional final quarter turn using a suitable spanner is sufficient to create the required watertight seal. Care should also be taken when fitting brassware to prevent similar stress related failures. All products should be inspected before attempting installation.

It is the responsibility of the individual installer to ensure that products are fitted correctly and in line with the recommended fitting instructions provided. Failure to do so will invalidate the guarantee.

Cleaning

All Crosswater products should be cleaned as outlined below. Never use any aggressive fluids or strong household cleaning agents e.g. bleach, caustic soda or abrasive cleaners, which could damage the product.

Furniture should be wiped cleaned with a moist soft or micro fibre cloth. Any stubborn marks can be removed with diluted mild detergent.

Mirrors, cabinets and light fittings should be cleaned with a micro fibre cloth only, do not use "glass and mirror" cleaning products.

Sanitary ware, glass basins and ceramics should be cleaned after use by applying a little cream-type cleaner using a sponge or damp cloth and rinsed thoroughly with clean water. In hard water areas a good quality limescale remover can be applied.

Toilet seats should only be cleaned using a diluted mild detergent or warm soapy water; products containing bleach can lead to staining. Toilet seat hinges should be cleaned using a moist soft or micro fibre cloth. Any stubborn marks can be removed with diluted mild detergent.

Cast mineral resin basins should be cleaned using a diluted mild detergent or warm non-abrasive soapy water; in hard water areas a good quality limescale remover can be applied. Accidental spillages of household chemicals, nail polish or hair dye should be removed immediately by cleaning the surface with warm soapy water and then wiped dry.

Towel Warmers should be cleaned when cold with a moist soft or micro fibre cloth. Any stubborn surface or oxidation marks can be cleaned with Maas® Metal Polishing Crème, that will leave a long-lasting, fingerprint repelling protective finish.

Product Guarantee

All Crosswater products carry a comprehensive guaranteed for complete peace of mind.

All Crosswater guarantees are subject to online registration.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit www.crosswater.co.uk

Crosswater guarantees do not affect your statutory rights.
