Imēx Rimless

Generation Rimless

The ultimate in hygienic performance

The IMEX range of rimless WCs offers a modern, precision engineered solution to the contemporary bathroom that sets it apart.

With no internal rim, the innovation flushing system swirls water across the entire WC pan, removing any residue and leaving the WC clean and fresh – even at volumes of water as low as 4/2.6L, unlike traditional box rim toilets.

The open design and clever flushing system delivers a splash free flush and as there is no rim to harbor bacteria or germs, reduces the need for chemical cleaning products, making it an easy-to-maintain, more hygienic choice.

- Easy to clean
- High gloss easy clean glaze
- Hygienic design, reducing bacteria build up
- Water saving and efficient
- Innovative patented design
- Available across many collections

PURACAST®

BATHS OF STRENGTH & BEAUTY

WHY CHOOSE PURACAST?

Puracast baths are the ultimate premium bath.

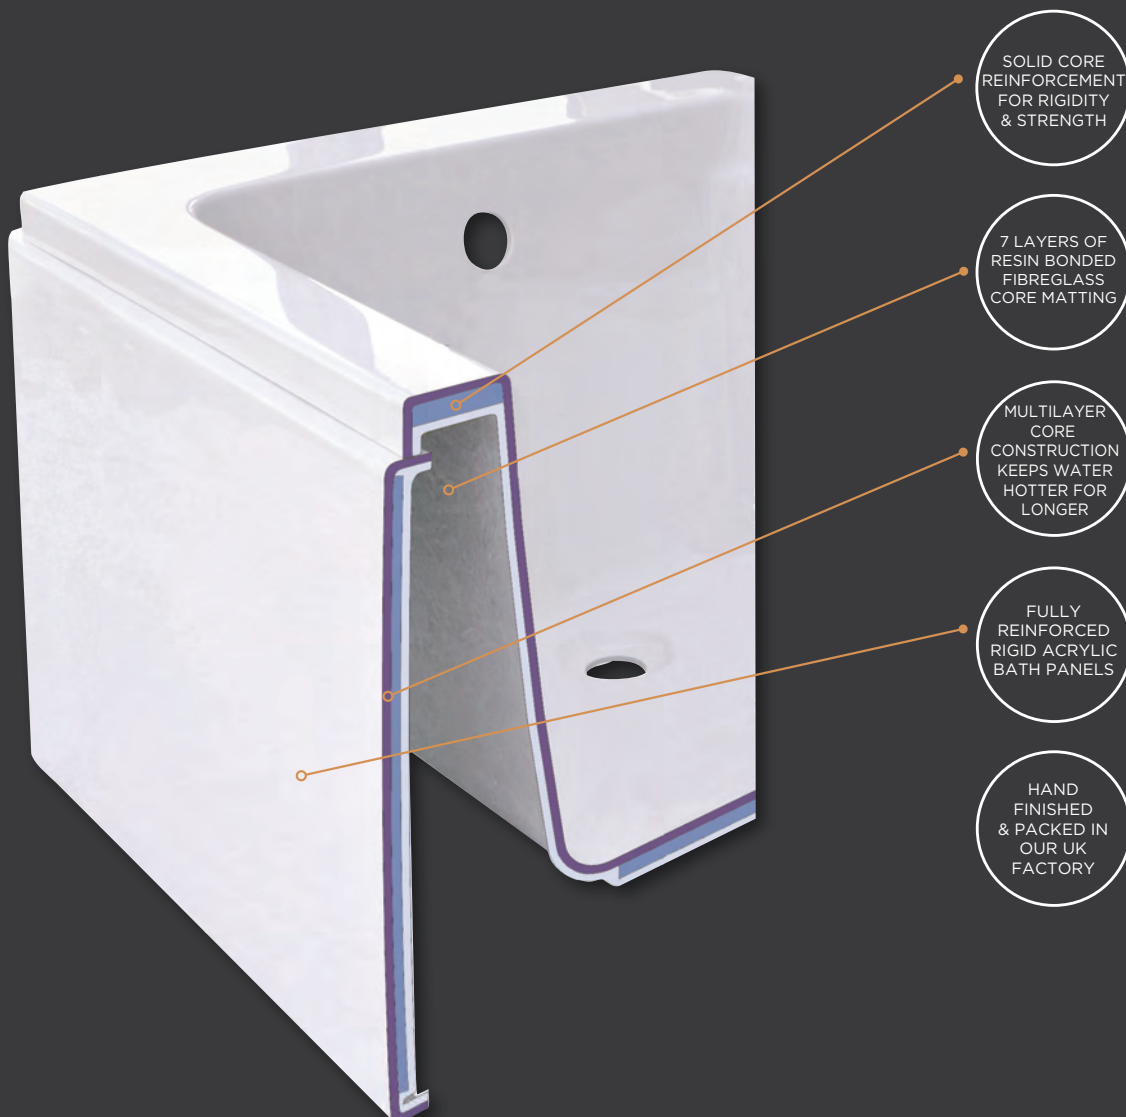

Hand finished in the UK to the most exacting of standards, they are rigid, durable, strong and with a reassuring substantial weight, are perfect for all bathrooms, regardless of bath style chosen.

The versatility of the materials used, the advanced manufacturing process and the quality of our craftsmanship means that Puracast baths can be designed in beautiful sculptural shapes that suit the contemporary bathroom.

Made from a generous 5mm of acrylic, the baths are reinforced with 7 layers of hand applied fibreglass core matting and resin bonding. Plus the timber framed bath rims and bath bases are fully encapsulated in fibreglass matting and resin bonding providing extra rigidity, meaning the bath will not 'flex' when you step in.

The Puracast bath range would not be complete without a water saving 'eco' option. Perfect for anyone wanting to keep an eye on water bills or for builders and developers who need to meet new build compliance regulations.

Choosing the right 'eco bath' is simple. This special range is supplied with an undrilled bath overflow and arrives complete with a water capacity level indicator template, which allows you choose the desired water capacity for the bath.

Simply drill a 45mm hole at the water capacity level you require* and install the waste fitting. Finally remove the low tack, easy to remove label – it will not mark or damage the bath.

*To ensure there is no damage to your bath during installation Puracast Eco baths can be drilled at our factory, to your specification at no extra cost.

- Water saving features
- Ideal for new build specification requirements
- Adjustable overflow positioning
