Why Choose Crosswater?

High Quality Bathroom Solutions

Over time as bathrooms have evolved into more experiential spaces for relaxation & revitalisation, Crosswater has curated a comprehensive collection of high-quality solutions covering each essential element.

Shower outlets & valves

Accessories

From the elegant centrepiece and versatility of the basin mixer to the shower and water outlet which provides comfortable, refreshing and relaxing shower experiences right through to the beautiful finishing touches. Crosswater has it covered.

All Crosswater products are supported by a network of over 1000 approved retailers who can be found at www.crosswater.co.uk

Reassuring Performance, Always

For over 20 years, Crosswater has been recognised as a leading supplier of premium basin and bath mixers, shower valves, shower outlets and accessories. We employ a combination of trusted manufacturing techniques, high-quality materials, and finishes to bring you products of the highest possible calibre.

Rest assured, all of the products in this brochure are manufactured in accordance with all relevant British and European standards.

Complete Peace Of Mind

We're so sure of the quality of our products that we offer a 15 year guarantee on all brassware and shower valves in this brochure*

Additionally, a dedicated team of bathroom experts whose knowledge and experience are on hand and ready to help before, during and after your products are installed.

Full warranty terms and conditions are available at www.crosswater.co.uk

What's Your Style?

Whatever your style preference, Crosswater offers a wide range of contemporary and traditional bathroom ranges with matching basin mixers, bath fillers showers and accessories in to help you create your own perfect bathroom space.

Choosing Your Basin & Bath Mixer

We've made it easier than ever to create a complete solution that delivers on each element of bathroom function.

1. Choose your style

For the most comfortable operation and a modern look choose contemporary mixers with single lever operation. To capture the essence of years gone by, choose classic features such as crosshead handles, ceramic inserts and exquisite detailing.

Contemporary style (MPRO)

Classic style (Belgravia)

2. Identify your water system

To ensure the best possible performance, it is essential to choose products that are appropriate for the water pressure in your home. All products in this brochure are marked with a minimum pressure requirement to help you select the correct product.

For full details of UK water systems and the water pressure they deliver, please see page 334.

3. Choose your product type

Most basins come with either 1, 2 or 3 tap holes. Many modern basins have a single tap hole that will accommodate a monobloc mixer tap which mixes the hot and cold with a single control handle. Traditional-style basins are likely to come with 2 holes for separate hot and cold pillar taps. Bath taps can be mounted on the deck, wall or in some circumstances on the floor. Deck mounted bath fillers can also include a shower handset.

Additionally, if you have a bidet, we offer bidet mixers in selected ranges.

Basin

Single Tap Hole Basins

Basin monobloc mixers need to be paired with a simple click-clack waste (A), but some also offer a pop-up waste (B). For smaller basins, a range of mini mixers are available, page 264.

2 Tap Hole Basins

Basin pillar taps are for two tap hole basins and feature separate controls for hot and cold water.

3 Tap Hole Basins

Basin 3 hole mixers accommodate hot and cold controls along with a separate water spout. These can be deck and wall mounted.

Basins with No Tap Hole

Some basins have no tap holes.

In this scenario, you may want to choose either a monobloc which stands to the side of the basin or mount the taps on the wall.

Tall Monobloc

Basin Monobloc

Wall Mounted 2 or 3 Hole

Bath

Single Tap Hole Baths

Bath monobloc fillers need to be paired with a separate bath waste.

2 Hole Baths Deck Mounted

Bath fillers (2 hole) feature separate controls for the hot and cold water.

Bath Shower Mixer

Bath shower mixers and kits (2 hole) feature separate hot and cold water controls along with a shower handset. Additionally, 4 or 5 hole versions complete with handsets are available in selected ranges.

Wall / Deck Mounted 3 Hole

Bath fillers (3 hole) feature separate hot and cold water controls, along with a water spout. These can be deck (A) mounted or wall (B). Additionally, 2 hole versions are available in selected ranges.

Bath Overflow Filler / Spout

Bath overflow fillers which allow filling of the bath from the waste overflow (A) or bath spout (B) require an independent valve with flow control.

Floor Standing

Floor standing bath fillers need to be fitted to and under the floor, and come in both manual and thermostatic variants.

Creating Your Perfect Shower Experience

Choosing your perfect shower is an intensely personal choice. You may prefer a fixed overhead shower, the flexibility of a handset or body jets to create an enjoyable spa-like experience. Your showering preference may be to invigorate and wake you up, or to help you relax at the end of a long day.

1. How many water outlets?

One outlet showers deliver water to a single outlet. Examples of shower outlets and installation types are listed below.

Two outlet showers deliver water to two water outlets where you can divert between the two or with some shower valves, have both outlets on at the same time.

Three outlet showers allow water delivery from 3 outlets with the ability to switch between the 3 or have any two working at the same time.

2. Where will I install the shower outlet?

Fixed Head - Wall

This type of shower head is attached to the wall but extends out via an arm and typically points straight down ensuring greater coverage of user.

These shower heads usually only have one type of flow pattern.

Fixed Head - Ceiling

This is similar to a wall arm type but is attached to the ceiling. Illuminated options are available in this installation type.

Fixed Head - Ceiling Recessed Ideal for low ceilings or for those

who seek a minimal look, recessed shower heads fit flush to an overhead surface and are available in round and square designs. Illuminated and multi water flow options are available in this range including cascading waterfall effect, gentle rainfall and fine mist spray.

Fixed Head - Wall Integral

These shower heads are attached directly to the wall and can create the ultimate shower experience and statement style. Options within this range can feature a combination of water flows including cascading waterfall effect, gentle rainfall, invigorating spray jets for the ultimate experience.

Handset & Slide Rail

Ideal for families where there are variances in height, a handset and rail kit adjust the shower handset to individual heights and angles. All riser rails are friction free, so they can effortlessly glide to the right position.

Handset in Wall

Handsets which sit in a bracket which is attached to the wall provide the ideal solution when accommodating for a second shower outlet. They include compatible hoses and wall outlets for a minimal design which will complement your existing brassware.

Body Jets

Body jets are fitted into the wall and can be positioned to suit you. The range has numerous options in terms of design and function. Many of the body jets are adjustable and can be placed easily for each user. There are also rotating options which provide an invigorating spa-like

Choosing a Thermostatic Shower Valve

Shower valves control the flow of water and temperature. To ensure the very best levels of safety and comfort, you should always choose a thermostatic option.

Safety

Thermostatic shower valves feature an in built anti-scald device to protect you and your family. With a thermostatic shower, you'll never suffer a scalding or freezing blast of water, ensuring complete safety.

Comfort

Thermostatic showers are designed to maintain the water temperature, so if somebody flushes the toilet or turns on another tap somewhere else in the house your shower is never affected ensuring complete comfort.

Quality & Performance

All Crosswater thermostatic showers use only the highest quality components such as the class-leading CA43 thermostatic cartridge from Vernet and Fluhs ceramic discs, both of which deliver precise temperature and flow control, even after years of prolonged use.

STRONG HEART. AMAZING SHOWER.

At the heart of Crosswater's amazing showering experience is CROSSBOX. One universal easy-fit box offers 1, 2 or 3 water outlet options to create your perfect shower.

QUICK AND EASY INSTALLATION.COMPLETE PEACE OF MIND.

A super-slim 60mm minimum installation depth, smaller piping footprint and secure mounting options all reduce wall preparation and installation time.

The supplied pressure testing plate provides an easy way to check all the connections, and if the hot and cold feeds have accidentally been reversed, the non-return valves can easily be switched to sort the problem at no extra cost.

CROSSBOX offers reduced handle projection, our quietest possible shower and guaranteed comfort and safety using the latest technology and proven components.

Our wide choice of trimsets allow you to match the most popular Crosswater bathroom ranges.

For precise temperature control and guaranteed safety, Crossbox uses the class-leading thermostatic control cartridge from French supplier Vernet.

All flow controls are sourced from the internationally renowned German producer Fluhs delivering ease of use, reliability and longevity.

To keep water safe and healthy Crossbox uses non-return valves form the industry's gold standard supplier Neopearl.

Each Crossbox Universal Valve has been fully approved by both WRAS and KIWA for complete peace of mind.*

Conventional Handle

Crossbox features a single flow control which can divert between 1, 2 or 3 water outlets.

On a 2 outlet version, either outlet can be on individually or both together. On a 3 outlet version, each outlet can be on separately but not together with any other.

Thermostatic temperature control

Push Button MPRO only

Crossbox Push features 2 or 3 easy to operate push buttons to switch the water flow on and off. Water outlets can be on individually or at the same time as each other.

A simple flow control ring surrounds the push buttons allowing you to control the overall water volume to perfectly match your personal preference.

Thermostatic temperature control

CREATE YOUR PERFECT SHOWER. FIND YOUR FAVOURITE LOOK.

Step 1.

Specify the installation box, this is super easy as there is only one. The code is CROSSBOX.

Step 2.

Choose your preferred trimset which includes flow controls, temperature control, backplate and handles; and the number of water outlets you require.

For 1 outlet, the code must include 1000.

For 2 outlets, the code must include 1500.

For (3) outlets, the code must include 2500.

CROSSBOX. HANDLE.

Must be ordered with a Crossbox Universal Valve

Must be ordered with a Crossbox Universal Valve.

Multifunction Valves

Multifunction thermostatic shower systems extend the exposed offer incorporating a versatile handset, overhead shower and valve in one single product. For our full range

Exposed Valves

Crosswater's exposed thermostatic shower mixers are as safe and easy to use as the recessed valves but are fitted on-the-wall rather than behind it.

They all feature an easy-to-use installation kit for convenient fitting and are most often used when replacing an existing exposed shower or in a situation where it is not suitable to dig into the wall.

For our full range see page 308.

Manual Valves

Unlike thermostatic shower valves, manual shower valves do not regulate the temperature of the water.

So, if somebody should turn on another tap elsewhere in the house, you may find that the water runs too hot or too cold.

This can mean manual shower valves aren't always suitable for some, as there is the possibility that the water may become uncomfortably hot.

BASIN WASTES& TRAPS

Basin wastes to match your bathroom perfectly

The most popular Crosswater waste is universal, which will work with basins with or without an overflow. Separate slotted and unslotted options are also available, which adds simple pop-out cleaning.

Slotted Waste

If your basin has a built-in overflow, you will need a SLOTTED basin waste which will allow overflow water to be drained, whether the waste is open or not.

If your basin doesn't have a built-in overflow, you will need a UNSLOTTED basin waste which is watertight and does not allow overflowing water to feed into the waste pipe.

Typically Crosswater wastes have a premium and straightforward click-clack mechanism which requires a single push to close and to open, but a permanently open free-flow waste is also available. The flip-top waste spins in within itself to close and open the water flow.

Sensor Technology

This chrome kitchen mixer with on/off sensor is the latest addition to the stylish Cucina Kitchen range.

A single mixer handle with elegant swan neck design, high spout for easy filling of large saucepans plus the smart on/off sensor enabling hands-free operation. Perfect for situations where you need to wash your hands but might not want to contaminate the mixer handle – for example when preparing chicken.

Saves energy by not activating hot water systems for short bursts. Safe as it prevents an instant rush of hot water. Great for rinsing your fruit and vegetables.

Please note: Battery operated (4 x AA batteries so no electrician required). The sensor only controls the cold water feed meaning you cannot get hot water via the sensor mechanism.

Understanding your water system

To select a showering system that will give the optimum performance, you need to identify the water pressure of the plumbing system in your home.

What is water pressure?

Water pressure is a term used to describe the flow strength of water through a pipe. It is measured in bar.

Why is this important?

While the majority of Crosswater products are compatible with most systems, some products require a certain level of pressure to work effectively.

All products in this brochure are clearly marked with a pressure rating in bar, and you must check that your water system can produce the required level to deliver the best experience.

Water saving regulators

Should you wish to reduce the water consumption of your household, you can easily insert a flow regulator into your basin tap or shower hose/head.

5 lpm Basin Tap Flow Regulator

Designed for taps with screw in

circular aerator housing

Hot Gravity & Cold Gravity/Mains

Low Pressure Systems

- You have a cold water storage tank in the loft.
- · You have a hot water cylinder.
- You do not have a shower pump installed.

If all of the above apply to your home, you can only choose products marked with 0.2 bar.

If you live in a two-storey property, the downstairs areas will typically support products marked with 0.2 – 0.5 bar where the cold water tank is in the loft.

Combination Boiler

High Pressure Systems

- You have a combination boiler that heats water on demand.
- · You do not have any storage tanks.
- You do not have a shower pump installed.

If all of the above apply to your home, you can choose any product from 0.2 – 1.0 bar.

Mains High Pressure

High Pressure Systems

- You have an unvented cylinder with an expansion cylinder.
- You have no cold water tank in the loft.

If either of the above apply to your home you can choose any product marked $0.2-3.0\,\mathrm{bar}$.

Pump Assisted

High-Pressure Systems (0.5 bar and above)

• You have a booster pump fitted.

Where a gravity flow of water is more than 0.6lpm, this is known as a 'Positive Head' condition (e.g. when your shower head is positioned lower than your cold water storage tank). In this situation, a positive shower pump can be used.

A Negative Head' condition is when the gravity flow of water is less than 0.6lpm (e.g. when your shower head is positioned above the cold water tank level). In these conditions, a negative head pump must be used.

Negative shower pumps will work in both positive and negative head conditions. So, for example, in a situation where there is a shower head above and below the water tank level, one negative shower pump can be used for both.

By matching the pump output to the required flow, you can install any of our products e.g. a 3 bar pump ensures you can select all products marked 0.2 – 3.0 bar.

Product Guidelines

Product Compatibility

While the majority of Crosswater products are compatible, care should be taken on product selection before ordering to avoid installation issues.

Cleaning

All Crosswater products should be cleaned with warm soapy water only and polished with a clean, soft, dry cloth.

More information can be found at www.crosswater.co.uk

Quality

All Crosswater brassware products are manufactured to the following standards, where applicable:

- EN 817:2008 for mixer valves
- EN 200:2008 for single and combination taps
- EN 1111:2017 for thermostaic mixing valves
- EN 1112:2008 for shower outlets
- · BS EN 1113:2015 for shower hoses
- EN 248:2002 for electrodeposited coatings of Ni-Cr

15 Year Guarantee

All Crosswater brassware and shower valve products are guaranteed for 15 years unless otherwise stated.

All Crosswater guarantees are subject to online registration.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit www.crosswater.co.uk

Crosswater guarantees do not affect your statutory rights.

Find a local bathroom specialist at www.crosswater.co.uk

Expertise, design & aftercare

Specialist bathroom retailers can offer expert assistance with your bathroom design, providing full 3D plans to help you visualise and create your own perfect bathroom space. Once your bathroom is installed, they can offer a personal point of contact for any after sales support you may need, delivering complete peace of mind.

Experience the products

The purchase process is an emotional one. Specialist showrooms allow you to touch and feel a wide variety of bathroom products in relaxed surroundings while gaining inspiration from knowledgeable professionals who will explain the benefits of each product and make recommendations that match your personal preferences.
